# LIMESTONE PAVING

Welcome to the MPG Stone Limestone Collection. For centuries, limestone has been the cornerstone of architectural beauty, celebrated for its natural durability, subtle elegance, and remarkable versatility. Our curated selection offers some of the finest limestones sourced from around the globe,

## Feature

## Benefit to Your Project

**Timeless Aesthetic :**

Soft, neutral color palettes—from creams and buffs to cool greys—and subtle fossilization provide a classic, sophisticated look that never dates.

**Exceptional Durability :**

A dense, hard wearing natural stone suitable for high-traffic areas, able to withstand the rigors of daily life and harsh external weather (with proper sealing).

**Versatility :**

Easily adapts to different styles and applications, available in various formats and finishes, ensuring continuity between indoor and outdoor living spaces.

**Thermal Mass:**

Offers natural insulating properties, helping to regulate temperatures, which can contribute to energy efficiency, especially in flooring and cladding.

**Workability:**

Its structure allows for custom cutting and specialist finishing, providing limitless design possibilities for bespoke features.

## Limestone Finishes: Tailoring the Texture

- Honed :** The most popular internal finish. This process creates a smooth, flat surface with a matte to satin sheen. It maintains a soft look while being easy to clean and comfortable underfoot. Ideal for kitchen floors, bathrooms, and hallways.
- Brushed :** Uses wire brushes to create a lightly textured, worn look. This subtle texture adds character and provides improved slip resistance over a standard hone.
- Tumbled:** Stone is processed in a rotating barrel with aggregate to soften and round the edges and corners, giving an aged, antique appearance. Popular for rustic patios and pathways.
- Natural Cleft / Riven:** Retains the stone's original surface texture from the quarry, resulting in an uneven, naturalistic, and highly tactile finish. Primarily used for exterior flagstones and walling.

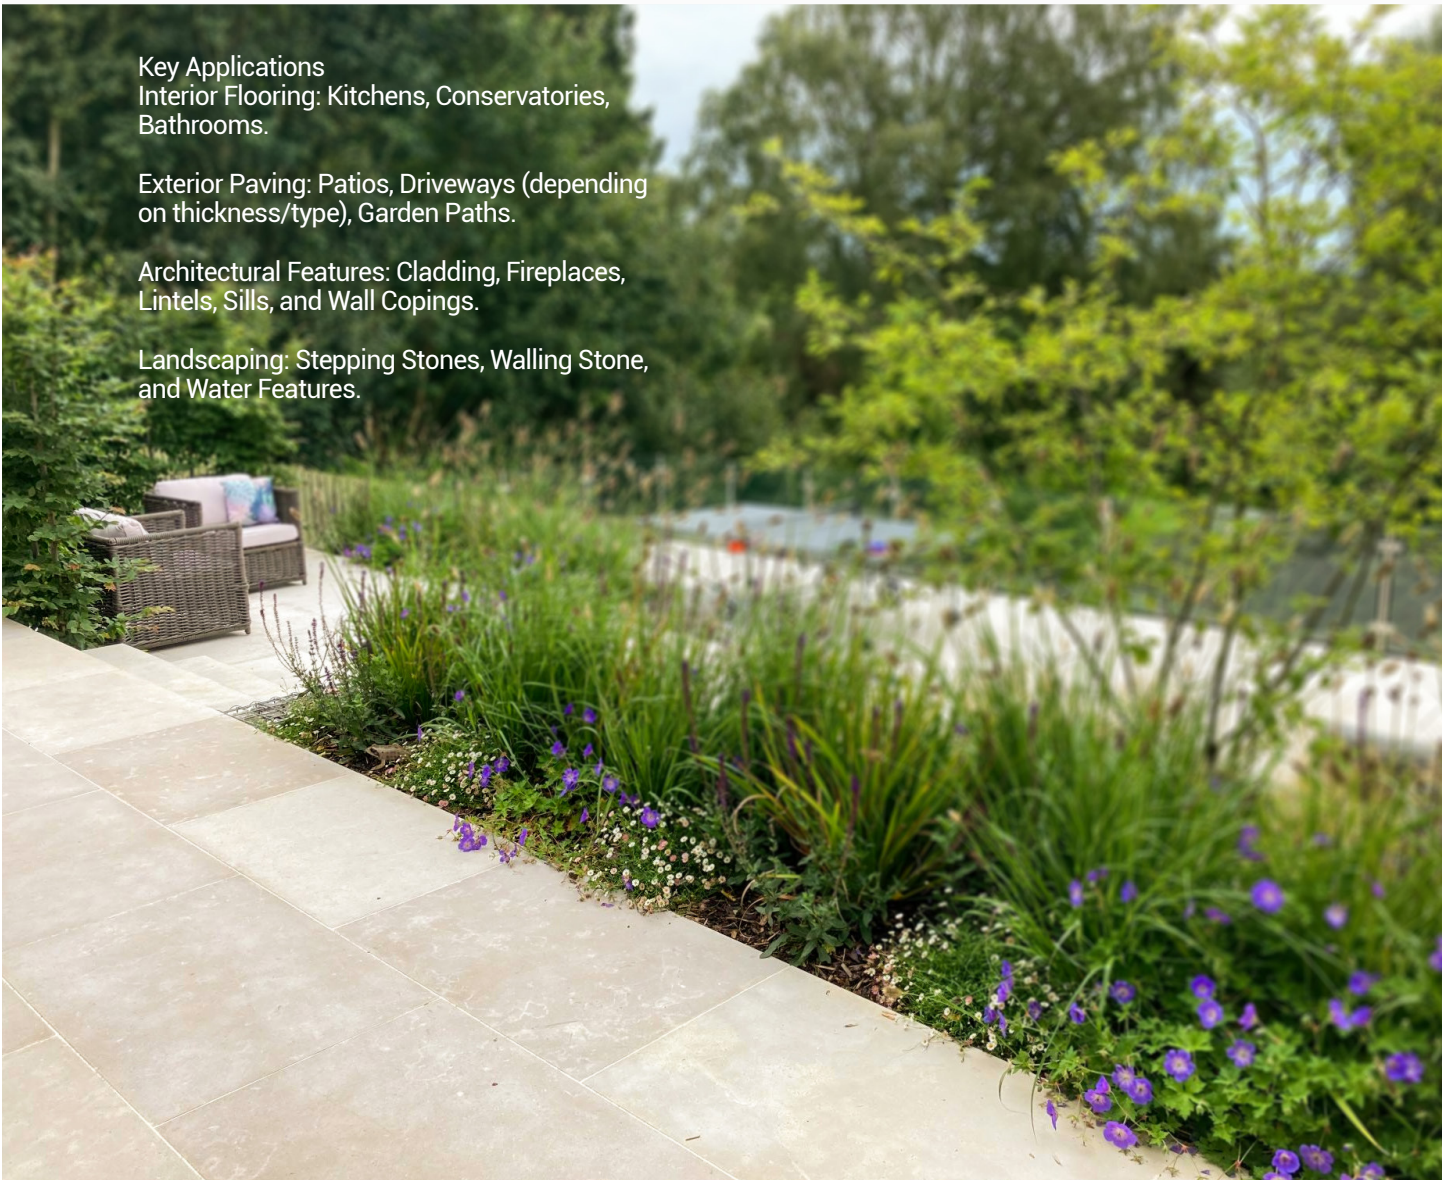

### Key Applications

Interior Flooring: Kitchens, Conservatories, Bathrooms.

Exterior Paving: Patios, Driveways (depending on thickness/type), Garden Paths.

Architectural Features: Cladding, Fireplaces, Lintels, Sills, and Wall Copings.

Landscaping: Stepping Stones, Walling Stone, and Water Features.

## LIMESTONE PAVING

Upgrade your space with the unique yet durable charm of limestone tiles. Whether updating an existing patio or carrying out a full garden renovation, our selection of limestone paving can give it all! Our limestones offer style with practicality in all colors and textures. Choose any of the tiles and slabs, suitable for both indoors and outdoors. Explore our limestone category filled with a wide selection of colors and textures.
